AI-POWERED HIRING INTELLIGENCE PLATFORM

ResumeFlow

Complete feature reference & role-based access guide · March 2026

CAPABILITIES

Platform Features

Every feature built for real hiring teams — from candidate upload to final decision.

01

AI Resume Scoring

Mistral-powered scoring across 4 dimensions — Technical Skills, Experience, Education, Soft Skills — with per-job custom weights.

02

Custom Scoring Criteria

Set pass / review / fail score thresholds and dimension weights per job opening. AI adapts its model accordingly.

03

Batch Resume Upload

Upload up to 100 resumes simultaneously (PDF & DOCX). BullMQ processes everything in the background.

04

Real-Time Pipeline

Live status updates while resumes are processed — queued → processing → scored. No polling, no waiting.

05

Role-Based Analytics

Separate dashboard views per role. Admins see org-wide funnels. Managers track team output. TLs monitor pipelines.

06

Multi-Team Org Hierarchy

Full org structure: Admin → Manager → Team Lead → Recruiter. Every level has scoped, role-appropriate data access.

07

Talent Pool Search

Search all candidates across the org by skills, job title, and experience level. Build pipelines proactively.

08

CSV Export & Reports

Export all candidate data, AI scores, matched skills, and pipeline status for any job with one click.

09

Multi-Team Job Assignment

Jobs can be assigned to multiple teams simultaneously. Team Leads then assign individual recruiters to each job.

10

User Management

Admins can create, edit, deactivate, and reassign roles for any user. Full org structure control in one place.

11

Settings & Password Change

Users can update their own password. Admin-managed accounts with role & team configuration.

12

AI Outbound Calling (Pipeline)

Automated candidate phone screening via Plivo + Deepgram + ElevenLabs + OpenAI. Transcripts stored and evaluated.

ROLE-BASED ACCESS

Who Can Do What

Each role gets exactly the tools and data they need — nothing more, nothing less.

Admin

FULL PLATFORM ACCESS

- ✓ **User Management** — Create, edit, deactivate any user; assign roles
- ✓ **Org Structure** — Create and manage all teams; assign managers
- ✓ **All Jobs** — View, create, and manage every job in the org
- ✓ **All Candidates** — Access every candidate across all jobs and teams
- ✓ **Full Analytics** — Org-wide funnels, pass/fail rates, team comparisons
- ✓ **Resume Upload** — Upload to any job in the org
- ✓ **Scoring Config** — Set AI criteria on any job
- ✓ **CSV Export** — Export data from any job
- ✓ **Talent Pool** — Search entire candidate database

Manager

TEAM & JOB OWNER

- ✓ **Job Creation** — Create new jobs and configure scoring criteria
- ✓ **Team Assignment** — Assign teams and Team Leads to their jobs
- ✓ **Their Jobs** — Full visibility into all jobs they own or manage
- ✓ **Team Analytics** — Pass rates, recruiter leaderboard, team funnel
- ✓ **Recruiter Output** — Per-recruiter upload counts, scores, funnel stages
- ✓ **Resume Upload** — Upload to jobs they manage
- ✓ **CSV Export** — Export from their jobs
- ✓ **Talent Pool** — Search candidates in their scope

Team Lead

TEAM PIPELINE MANAGER

- ✓ **Recruiter Assignment** — Assign recruiters to specific jobs
- ✓ **Team Job Pipeline** — All jobs assigned to their team
- ✓ **Recruiter Tracking** — Activity, uploads, and scores per recruiter
- ✓ **Top Candidates** — View top-ranked candidates for team's jobs
- ✓ **Resume Upload** — Upload to any job assigned to their team
- ✓ **My Teams Page** — Manage job ↔ recruiter assignments
- ✓ **CSV Export** — Export from assigned jobs

Recruiter

CANDIDATE UPLOADER

- ✓ **Resume Upload** — Upload to jobs they are personally assigned to
- ✓ **Candidate Management** — View and manage candidates in assigned jobs
- ✓ **Personal Analytics** — Own funnel: upload count, pass rates, pipeline status
- ✓ **Matched Skill Insights** — AI-extracted skills vs. job requirements
- ✓ **Pipeline Status** — Live processing status of uploaded resumes
- ✓ **CSV Export** — Export from their assigned jobs

🔒 Data Scope Summary

Admin	→	Full platform — all orgs, teams, jobs, users, and candidates
Manager	→	Their jobs only + their assigned teams
Team Lead	→	Jobs assigned to their team + their team's recruiters
Recruiter	→	Only jobs they are personally assigned to
